

SAR:WABBS  
Summary 10-05-2018

## **10-05-2018 Meeting Summary**

First, we discussed about the Research Drive Orientation folder to know how to access the CITI training information. Niki showed that we have to go to the Human Subject Research page, then click on Info-Ed, and then click on the bottom link on the left side.

Next, we talked about the presentation in December whether Niki shall be there or not, and the answer is yes, Niki will be there. Besides that, the robot will also be presented at the presentation.

After that, we covered what progress the team had made last week and if the app could show happy or sad faces based on grayscale bitmap images. On the other hand, Kellen talked about the design of the app with Niki. One more thing that Soeren mentioned was that Niki's phone needs to be factory reset to be used with Android 5.0.

Kellen and Niki also covered the requirements document, answering questions and generally adding detail to it while getting clarifications on certain topics.

Lastly, Niki mentioned that Gavin would need WABBS next Friday for a presentation, so we will drop the phone that contains the app off next Thursday before 5 with Kellen installing the basic face app onto the phone prior to delivery.
